

I am begging you not to take away K-Love radio. Its been a part of my family for several years now. I don't listen to any other station. I donate every year to keep the station running. I love that its a pure honest station that I can feel secure listening to while my kids or parents are in the car with me. I listen to this station at home and in my car. Its a big part of the community as I get a lot of information from this station and know of several orgionizations that pull together for donations to the station. Without this radio station where it is, I will be forced to listen to cd's rather than the radio so I know I am still getting the insperation I need while doing what I am doing.
